

HOWTO

1) print the picture that you want to laminate

2) Cutout your picture with the trimmer

3) The picture has been cut-out perfectly

4) Choose the proper pouch:
The pouch needs to be a little bigger
as the picture

HOWTO

5) Place your picture in the pouch

** Always enter the closed part of the pouch first! **

6) Laminate the picture

7) Your picture has been laminated
BUT not as pretty because the edges
of the pouch are too large

8) Luckily we can crop the part of the pouch
that is too much

For that we use once again the trimmer
We leave an edge of 0,5-1cm

HOWTO

9) Normally a pouch has rounded edges, but because we have trimmed it, it now has sharp edges...auw!

10) Use the corner rounder to cut the sharp edges away

11) Result is a nice, beautiful cutout picture with rounded corners
